

Mikołaj Wójcik

miknios@gmail.com

Portfolio: www.miknios.com

Game programmer with 7 years of commercial experience working with Unreal Engine and Unity.

I specialize in gameplay systems, character controllers, movement, animation, UI, shaders, and visual effects.

For my side projects I also tend to handle non-programming work myself. This helps me better understand the needs of every discipline in the project and connect people together creating productive collaboration frameworks.

Skills + Tech

Unreal Engine | C++ | Editor Tools | Slate | ImGui | Unity | C# | Perforce | Git | DOD | ECS
Tech Art | Game Design | Animation | Blender | FMOD

Education

- 2017-2022 Bachelor of Science in Computer Science
Polish-Japanese Academy of Information Technology

Specialisation - Multimedia

Thesis: **Real-time fish simulation in Unity** – implemented movement algorithms using Data-Oriented Design, compute shaders, GPU Instancing, and vertex-shader animation to simulate and render large schools of fish

Experience

- 2024 - now Senior Programmer
Zakazane

- Owned complete cinematic dialogue editor suite used by writers, cinematic designers, and animators. It enabled interactive dialogues with choices, skill checks, branching, and other game-specific mechanics.
- Designed and implemented core gameplay systems (Quest, Map, and Interaction) that drive player progression and world interactivity.
- Developed multiple custom editor tools that improved team workflow and iteration speed for designers and artists.

Experience (cont'd)

- 2020 - 2023 **Lead Programmer**
Kool2Play
 - Led programming on **Uragun** (arcade twin-stick shooter), owning the majority of the codebase with a focus on fluid character movement, core gameplay loops, progression systems, UI, animations, shaders, and performance optimization.
 - Transitioned from individual contributor to Lead Programmer; guided the team through major refactoring to transform the game into a roguelike experience.
- 2020 **Programmer**
Noobz From Poland
 - Implemented Steam Workshop mod support from the ground up for the already-released **Total Tank Simulator**, enabling full community content integration post-launch.
- 2019 - 2020 **Junior Programmer**
Daftcode
 - Solely developed and shipped a hyper-casual mobile game that was published by a major publisher.
 - Contributed gameplay logic, custom shaders, and UI systems to **Legendary** (online tactical brawler), while gaining hands-on experience with ECS architecture.
